

Access Data from Windows Machine

a. Click the **Places** menu present at the top of the **Desktop** and select **Network** from the drop-down options.

b. The **Network** window appears; press **Ctrl+L**. The **Location** field appears; type **smb://10.10.10.10** and press **Enter** to access **Windows 10** shared folders.

c. The security pop-up appears; enter the **Windows 10** machine credentials (Username: **Admin** and Password: **Pa\$\$w0rd**) and click **Connect**.

d. The **Windows shares on 10.10.10.10** window appears; double-click the **CEH-Tools** folder.
